

# TSPAT

The TSPAT test challenges the way you think. Perhaps there are several options to find answers to the various questions, in addition to purely spatial explanations. This is a difficult test and I recommend that you spend much time on each question. In addition to the spatial challenges, there are also mathematical explanations on some of the issues.

I hope you find the test challenging and fun.

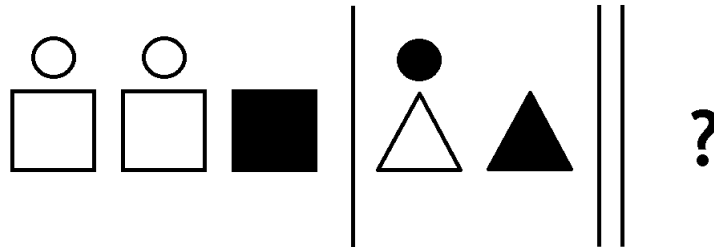

Send your answer to [tonnysellen@telia.com](mailto:tonnysellen@telia.com). The test is free and 2 submissions are allowed.

Good luck!

1.

*Hint: This is a form of equation. The first answer is given, a black circle, a white and a black triangle.*

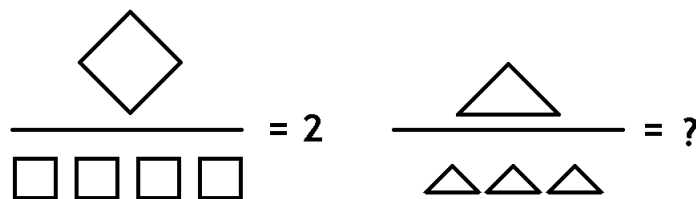

*But what should replace the questionmark?*

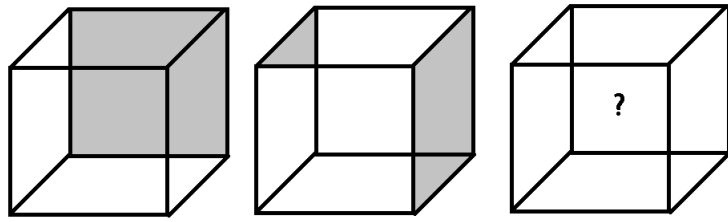

2.

*Hint: The answer to the first question is 2. What is the answer for the second question?*

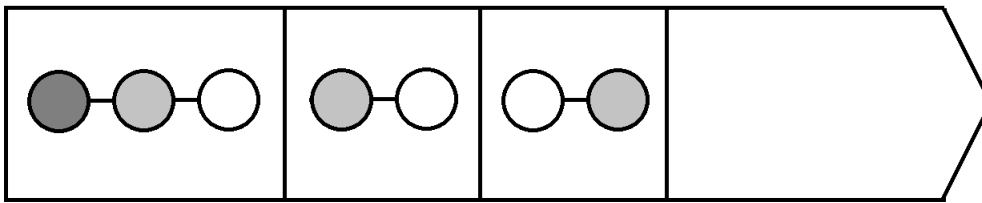

*Hint: Use the figures to find the answer.*

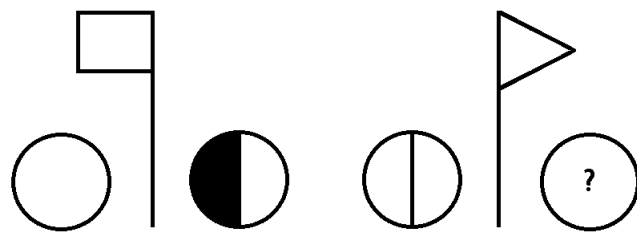

3.

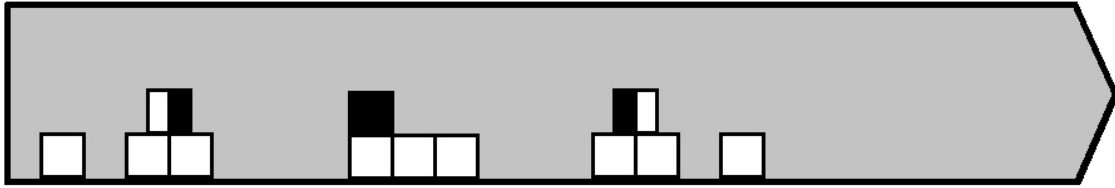

4.

5.

6.

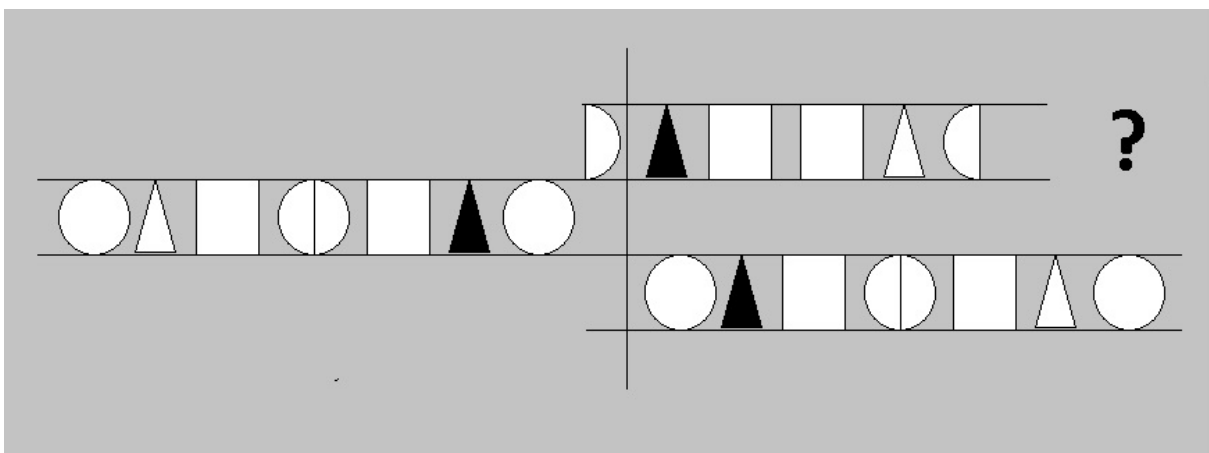

7.

*What is needed to change the first picture?*

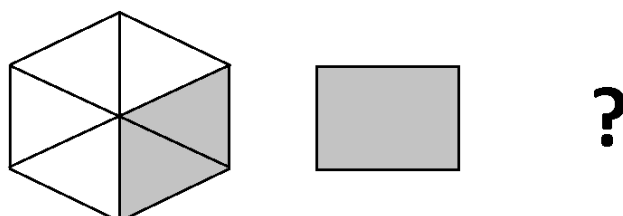

8.

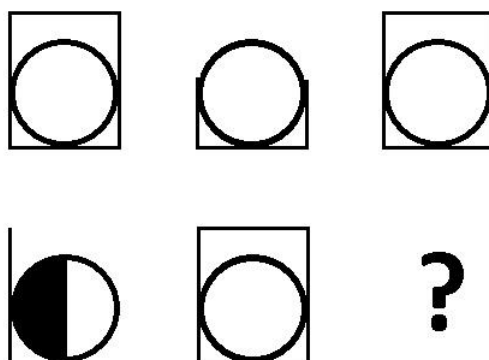

*One item are missing. What is it and where should it fit?*

9.

10.
